USPS enhances security for direct deposit

The Postal Service has introduced a new process to validate banking information for direct deposit of paychecks.

Beginning March 20, when employees enroll in or update banking information for direct deposit in PostalEASE, the system will initiate a \$0 test transaction to verify the bank account.

This change does not affect employees who are already enrolled in direct deposit and make no changes to their banking information.

The \$0 transaction is not a payment and does not withdraw funds. It is used only for account verification.

If a bank account cannot be validated, the employee will receive a notification by email and through PostalEASE. Pay will continue by paper check until the account is verified.

Employees with questions can contact the Accounting help desk at 866-974-2733.

Thank you for listening.
